

JOB DESCRIPTION – DEVELOPER

We are looking for a Developer for our office in Cambridge (UK) to create demos and proof of concepts.

Role

As a developer you will be responsible for creating customer-facing tools like demos, updating our crypto lab and customer-specific proof of concepts. Some tasks include revamping existing systems while others require you to start from scratch.

Working environment

You will be a member of our EMEA team and working with colleagues in marketing (primarily for the web site), sales (for PoCs) and R&D (for integration and crypto labs), where the web site work is centred around on-line demos for major Cryptomathic products.

Based in Cambridge, you will be part of a dynamic and competent team working in a friendly and spacious environment on the Science Park. The team is part of Cryptomathic's EMEA operations and you will report directly to the EMEA Director while being guided by a Senior Solutions Architect.

Our expectations of you

We are looking for someone with an outgoing personality with good communication skills and we expect you to have:

- A degree in engineering, computer science or similar
- Significant experience in Javascript and HTML 5
- Experience in Java and preferably C++
- Appreciation of network infrastructure technologies, including TCP/IP, routing, VLAN, and firewall
- Some experience in relational database management
- Have undertaken a self-consistent, significant body of computer science work that is at least 50% your work that you can discuss at length

Ideally you also have experience in IT security, particularly cryptography although this is not a prerequisite- you may be straight out of university, for example. Very occasional travel within Europe may be required.

What can we offer you

We can offer an exciting and challenging job with room to gain experience and thrive in an international and renowned company. Particularly as a developer you will thrive given that 80% of the company's employees have a relevant technical degree and 60% of the employees are developers (based in Denmark). We can also offer an interesting career path, including moving into other functions.

CRYPTOMATHIC

Salary

Cryptomathic offers a very competitive salary in-line with experience and theoretical background.

About Cryptomathic

Cryptomathic is one of the world's leading providers of security software solutions to businesses across a wide range of industry sectors, including banking, government, technology, cloud and mobile. With more than 25 years' experience, we provide systems for eBanking, PKI, ID & ePassport, card issuing, advanced key management and managed cryptography, through best-of-breed security solutions and services. The company is privately held, experiences a high rate of growth and has offices in Denmark, Germany and USA with active expansion plans for the Middle East and South East Asia.

Application

Please send your Application, CV and relevant diplomas to: jobs-uk@cryptomathic.com.

Note: Recruitment agents are welcome to send CVs via email but Cryptomathic will not accept any cold calls.
