

# OBSIDIAN

Ease compliance burdens and drive efficiency with Cryptomathic's Obsidian Payments Platform.

Obsidian revolutionizes payment issuance and empowers FinTechs, banks and financial institutions to securely deliver a mobile-first experience.

## 1 A modern, unified and modular platform

Empower faster growth and improve user experiences by expanding your portfolio with virtual cards and enabling cardholders to customize their PIN across multiple channels, including mobile apps. Customers expect greater flexibility than ever before, Obsidian puts you in pole position to exceed expectations.

## 2 Quicker market entry for FinTech's

Accelerate market entry and gain competitive edge with super fast payment card issuance.

## 3 A Mobile Application Centric Approach

Achieve the highest levels of mobile payment app and wallet protection without sacrificing user experience. Cryptomathic's Mobile App Security Core provides complete security so you can focus on functionality and user experience.

## 4 Ease and simplify PCI compliance

Streamline compliance and minimize security audit times by implementing PCI best practices and using PCI HSMs from day one. Obsidian ensures robust security and easier regulatory adherence.

## 5 Reduce cost with cloud readiness

Flexible deployment options across major cloud providers, hybrid environments, or on-premises, ensures seamless integration and scalability to meet your specific industry and commercial needs.

## 6 Remove the hurdle of managing your HSMs

Enjoy rapid deployment and global PCI compliance with managed HSMs across multiple data centers, safeguarding your sensitive data and meeting industry standards efficiently.

## 7 Simplify key management

Simplify payment card security with top-tier, user-friendly key management tools and comprehensive global solutions. You can focus on what matters most knowing that your payment keys are secure and compliant.
